

IRTP Update - ICANN Meeting in Dakar

The Inter-Registrar Transfer Policy (IRTP) is a consensus policy that was adopted in 2004 which provided for a straightforward process for registrants to transfer domain names between registrars. The Generic Names Supporting Organization (GNSO) Council established a series of five Working Groups (Parts A through E) to review and consider various revisions to this policy. During this session an update will be provided on the status of the different IRTP related initiatives:

- a) IRTP Part B - Status of implementation of the recommendations adopted by the ICANN Board (see <http://www.icann.org/en/minutes/resolutions-25aug11-en.htm#1.2>)
- b) IRTP Part B - Status of recommendations awaiting staff proposals (see <http://forum.icann.org/lists/gnso-irtp-b-jun09/msg00834.html> for latest draft of staff proposals)
- c) IRTP Part C - Initiation of Policy Development Process and Call for Volunteers (see <https://community.icann.org/display/gnsoirtpdpwg/Home>)
- d) 'Thick' WHOIS - Request for an Issue Report on the requirement of 'thick' WHOIS for all incumbent gTLDs as recommended by the IRTP Part B Working Group
