Invitees: Mr. Fadi Chehade & Mr. Nigel Hickson

The meeting starts with Mr. Chehade talking about the challenges ICANN is facing and the steps to take next.

A brief debate starts about EURALO role in this new scenario and the importance of multi-stakeholderism, which may be slower in producing results, but much more effective in terms of outcome and agreement quality and sustainability.

Having finished this debate, the GA starts.

Part C

10. How to improve EURALO's in-reach and members involvement.

An interesting debate arises. EURALO has a great potential, but needs to use it; we are not yet there. EuroDIG is so far our best outcome.

11. Definition of thematic priorities

Europe has a different perception of privacy than the U.S. and sometimes even ICANN. Data protection and privacy are among EURALO's key interests. Different ALSes can push their own agenda too. The thematic priorities defined and listed during the meeting are attached to the minutes from the Lisbon GA.

12. How to encourage more participation.

This has been always a difficult topic. Various members who do not participate much at the EURALO and ALAC level are active on the local or regional ground. Many ALSes face capacity problems to do and engage more. It seems that encouraging ALSes to lead their own topics and mixing experienced members with less experienced may be a way to go. Bridging various levels of focus and specialization remains a continuing challenge for EURALO the next years.

13. Briefing on EuroDIG 2013 and suggested EURALO ALS activities

Attendees talk about the different topics that will be covered during the upcoming EuroDIG 2013 and which may be more interesting and related to their daily work from an ALS perspective.

14. Miscellaneous: ATLAS II

Mr. Olivier Crepin-Leblond shortly summarizes planning for ATLAS II approximately in summer 2014 in London. More EURALO members are invited to join the different WGs for the Summit planning and org.

15. Closing

And with no other business to deal with, the assembly closes at 19:45 followed by an ICANN – EURALO Outreach reception for EuroDIG participants and the local community.
