

Negotiations Between ICANN and Registrars to Amend the Registrar Accreditation Agreement Concluded

ICANN-accredited registrars and ICANN commenced a series of direct bilateral negotiations to amend and update the current Registrar Accreditation Agreement (RAA) in November, 2011. ICANN and the registrar negotiation teams have concluded their negotiations. The ICANN Board of Directors [approved the new 2013 RAA](#) on 27 June 2013.

Negotiation Goals/Objectives

During the ICANN Dakar Meeting, ICANN and the Registrar Stakeholder Group announced their agreement to commence negotiations on possible amendments to the RAA to address recommendations made by law enforcement agencies and the GNSO, provide increased protections for registrants, to enhance security generally, and to increase predictability for all stakeholders.

At its meeting in Dakar, the ICANN Board directed these negotiations to commence immediately, with the goal of reaching agreement on amendments that are "in the global public interest with the twin goals of registrant protection and stability..." for consideration by the ICANN Board at the Costa Rica Meeting.

ICANN and the Registrars have agreed to discuss the following topics in these negotiations:

- The law enforcement RAA recommendations, including as formulated by law enforcement in its proposed code of conduct;
- The "High Priority" recommendations from the joint GNSO/ALAC RAA Drafting Team's Final Report (see [Final Report](#));
- To the extent time permits, the "Medium Priority" recommendations from the joint GNSO/ALAC RAA Drafting Team's Final Report;
- Other topics that would advance the goals of registrant protection, DNS stability, and increased predictability for all stakeholders.

Background

In 2009, the GNSO Council embarked on a collaborative process with the At Large Advisory Committee regarding the RAA. As part of this process, a joint GNSO/ALAC drafting team was formed (known as the RAA Drafting Team or, "RAA DT") to consider various proposals for improvements to the RAA. The RAA DT reviewed proposals from the law enforcement community, the Intellectual Property Constituency, as well as other stakeholders. The RAA DT published a [Final Report](#) on 18 October, 2010, that identified potential topics to be addressed in an amended RAA. The RAA DT also propose several next steps for the GNSO Council to consider in determining whether to recommend a new form of RAA.

Prior to Dakar, Staff published a [Discussion Paper on the Next Steps for the RAA](#) that recommended the immediate commencement of bilateral negotiations with the Registrars. At Dakar, law enforcement representatives and other stakeholders debated the need for additional amendments to the RAA.

In Dakar, the ICANN Board adopted a resolution (2011.10.28.31) <<http://www.icann.org/en/minutes/resolutions-28oct11-en.htm#7>> acknowledging that the effort to evolve the RAA is an important element in a program to protect registrants and safeguard the stability of a single interoperable Internet. The resolution called for immediate negotiations and called on the negotiating teams to publish proposed amendments for consideration at ICANN's meeting in Costa Rica in March 2012. The Board resolution called on the negotiating teams to address of law enforcement and GNSO working group recommendations as well as other topics that would advance the twin goals of registrant protection and DNS stability. The ICANN Board also directed Staff to prepare an Issues Report with respect to any remaining items suited for a PDP.

The Registrars Stakeholder Group and ICANN announced in Dakar the immediate commencement of negotiations on the RAA.

Update:

ICANN published the Proposed Final 2013 Registrar Accreditation Agreement for public comment at:

<http://www.icann.org/en/news/announcements/announcement-22apr13-en.htm>

For a detailed overview of the improvements to the Proposed Final 2013 RAA, please listen to the [webinar recording](#) or view the [slides](#) from the webinar conducted by ICANN Staff on April 30th.

ICANN and the Registrar Negotiating Team commenced negotiation on amendments to the RAA in October 2011. Since the 7 March 2013 version was posted, ICANN and the Registrars (through the Registrar Negotiating Team) continued to reach agreement on the proposed text of the 2013 RAA, which was [posted for community comment](#) on April 22, 2013. These include:

- ICANN's Posting [Memorandum](#)
- [Proposed Final 2013 RAA](#)
- [Redline](#) against the 7 May 13 posting
- [Redline](#) against the 2009 RAA
- [Summary](#) of Changes from the 2009 RAA

The Proposed Specifications and Addendums:

Consensus and Temporary Policy Specification [PDF, 90 KB]	Redline Showing Changes from June 2012 Posting [PDF, 145 KB]
	Redline Showing Changes from March 2013 Posting [PDF, 161 KB]
Data Retention Specification [PDF, 77 KB]	Redline Showing Changes from June 2012 Posting [PDF, 113 KB]
	Redline Showing Changes from March 2013 Posting [PDF, 120 KB]
Whois Accuracy Program Specification [PDF, 86 KB]	Redline Showing Changes from June 2012 Posting [PDF, 121 KB]

	Redline Showing Changes from March 2013 Posting [PDF, 115 KB]
Whois SLA [PDF, 93 KB]	Redline Showing Changes from March 2013 Posting [PDF, 169 KB]
Specification on Proxy/Privacy Services [PDF, 43 KB] <i>Corrected version posted on 24 April 2013</i>	Redline Showing Changes from March 2013 Posting [PDF, 127 KB] <i>Corrected version posted on 24 April 2013</i>
Registrant Rights and Responsibilities Specification [PDF, 50 KB]	<i>No changes since March 2013 posting</i>
