The sub-team is expected to develop these working principles by reviewing:

- What guidance do ICANN core values (Bylaws Article 1, Section 2 - <http://www.icann.org/en/about/governance/bylaws#!>) directly provide with regard to policy development work and policy implementation efforts? (e.g., multi-stakeholder participation)
- What guidance do other ICANN Core values provide that relate indirectly to policy development and policy implementation? (e.g., effective & timely processes)
- Questions for discussion contained in the Policy versus Implementation Draft Framework prepared by ICANN Staff
- Review GNSO WG Guidelines and PDP Manual to identify possible existing principles (explicitly or implicitly)
- Review proposed principles in staff discussion paper (see [Proposed Principles from staff discussion paper.doc](#))
