

Sign-Up Sheet for Task 8 - Possible Requirements List

Per [RDS PDP WG Call 24 May, 2016](#), **Action item #3**, below please find the latest sign-up list allowing WG members to volunteer to review documents and identify possible requirements.

Instructions: This [wiki sign-up sheet](#) is to be used by RDS PDP WG members to volunteer to extract *possible requirements for gTLD registration data or directory services* (see <https://community.icann.org/x/8waOAw>). To volunteer, sign up for a key input document that is familiar to you by picking an unassigned document from the sign-up sheet (below). You may volunteer to review multiple documents, but please sign up for only one document at a time to give all a chance to contribute in parallel.

Sign up for a document by either

(a) adding your name in the Volunteer column to just one unassigned document below, or

(b) sending email to gns0-rds-pdp-wg@icann.org and staff will add your name to this sign-up sheet.

Please do not modify any other part of this sign-up sheet.

How to submit possible requirements: Send all possible requirements via email to gns0-rds-pdp-wg@icann.org. For each possible requirement:

- Identify the associated charter question(s);
- Succinctly quote or paraphrase a possible requirement, focusing on phase 1 policy requirements;
- Cite the source document by title and hyperlink. Possible requirements may also be submitted from new sources not already listed below.
- Many examples can be found in the latest draft of the WG list of possible requirements:
 - [Draft 5: RDS PDP Initial List of Possible Requirements for gTLD registration data and directory services \(28 October 2016\) \[PDF\]](#) and [\[DOC\]](#)
 - An Excel workbook version is also available for filtering: [PRSpreadsheets-D5Triage-28October.xlsx](#)
 - (Hint: Set all column filters to "All" to view all rows)

History:

Draft 3 of this document was originally attached to [Outreach Message #2](#) and provided to SO/AC/SG/Cs so that those groups could suggest any needed additions. WG members then extracted further possible requirements from additional documents (as recorded below) and from other sources for inclusion in Draft 4.

Draft 3 was also organized into grid format for triage into phases and groups - see [RDS PDP List of Possible Requirements D3 - TriageInProgress - 13 July.docx](#).

Draft 4 included all possible requirements submitted since the original publication of Draft 3, in triaged grid format, along with keyword and coding definitions - see [Draft 4: RDS PDP Initial List of Possible Requirements for gTLD registration data and directory services \(11 September 2016\)](#)

Next Steps:

All WG member submissions of possible requirements for registration data and directory services through 28 October 2016 have now been incorporated into:

- [Draft 5: RDS PDP Initial List of Possible Requirements for gTLD registration data and directory services \(28 October 2016\)](#)

This new draft:

- includes all possible requirements submitted since the original publication of Draft 4,
- deletes or moves possible requirements identified by the WG as having questionable relevance to the RDS,
- refines the code values initially mapped from keywords, and
- orders code and keyword values alphabetically for easier filtering.

Triage will continue as the WG incorporates additional possible requirements (see pending assignments below) and reviews and refines codings.

The WG will now begin deliberation using subsets drawn from Draft 5, considering the possible requirements themselves.

All WG member submissions to date can be found by clicking on "Y" in the "Done" column below.

Note:

Additional possible requirements have been submitted to the WG list from unpublished sources. Although these do not correspond to input documents and so are not listed above, those additional possible requirements can be found in the WG email archive and either have or will be incorporated into the draft initial possible requirements list. These additions include possible requirements gathered during the Cross-Community Session on RDS in Helsinki (see <http://mm.icann.org/pipermail/gnso-rds-pdp-wg/2016-June/000933.html>) and provided by SO/AC/SG/Cs in response to Outreach Message #2 (see [SG/C/SO/AC Input](#)).
