

ATLAS II Sub-Working Group: Survey

The **Survey Group** will be responsible for putting together a survey to determine the global and regional issues within the At-Large Structures (ALSes) as well as capacity building needs. This group should be also responsible for designing, in conjunction with the ROI group, a feedback form to capture summit impressions from attending ALSes.

1. Suggested parameters: Answering the survey should be mandatory for those ALSes interested in participating. The survey could include a section requesting feedback from ALSes on how to improve their inclusion into ICANN work, communication among themselves and between themselves and their RALO leadership, and the ALAC. It could also request ideas for outreach.
2. **OUTCOME:** a list of major topics and issues to be discussed during plenary conferences, workshops and Regional General Assemblies (RGAs) which will help drive the event schedule and its content. Also, it should generate a feedback form to capture summit feedback from attending ALSes.

To join the ATLAS II Survey Sub-Working Group and to follow its discussions, please sign-up for the [mailing list](#).
