

How do I make links?

Up: [Workspace Tour - Table of Contents](#)

Back: [What's the funny punctuation?](#)

Making links in Socialtext is very simple.

To add a link to a page in the workspace, first **double-click** to enter editing mode. Alternatively, click **Edit This Page**.

>> http://base/images/docs/Browse-Header-Edit_this_page.png

Write the name of the page you want to link to. Then, select the text you want to link. Click on <http://base/images/docs/Toolbar-link.gif> in the toolbar.

If you make a link to a page that doesn't exist yet, your link will appear with a dotted underline. When you click on the link, the page will be created.
