

Getting Started

[Watch Video Now](#)

Socialtext People

Allows you to easily access profile information about your colleagues, form social networks, locate subject matter experts, and discover the activities your colleagues are working on. [Help Documentation](#)

Go to your People (<http://?action=people>) page now...

[Watch Video Now](#)

Socialtext Dashboard

Provides you a personal home page. Here you can surface both business and personal content together on a single screen, helping you pay attention to the items most important to you. [Help Documentation](#)

Go to your Dashboard (<http://>) now...

[Watch Video Now](#)

Socialtext Workspace

A collection of wiki pages and weblogs, where you can collaborate with your colleagues to create, update, and share information. Workspaces are often organized around a common team, goal, or project. [Help Documentation](#)

[Watch Video Now](#)

Socialtext Signals

Provides social messaging integrated with Socialtext's enterprise collaboration platform. While it provides a lot of the same great benefits of other micro-sharing tools like Twitter™, Socialtext Signals also provides additional benefits because the messaging occurs in the context of people within an organization working transparently and collaborating on common goals. [Help Documentation](#)

Use Signals now by using the Signals Widget on your Dashboard (<http://>) or use our new Socialtext Desktop AIR Client
