21:15:18 From Joshua Ayayi to Everyone:
Joshua Ayayi (He/Him) from Ghana

21:17:46 From Jonathan Zuck to Everyone:
They often spend most of their time either "parked" or redirected to a legitimate site.

21:21:11 From Sivasubramanian M to Everyone:
If on a microcosmic or minuscule level, we can have a RegistrANT accreditation, some form of Registrant authentication, not quite like KYC, then it becomes easier to tag malicious bulk registrations

21:21:49 From Sivasubramanian M to Everyone:
(in response to "currently there are no tools to predict bulk registrations)

21:22:34 From Sivasubramanian M to Everyone:
Such an accreditation (a big word) process would also deter malicious registrations

21:22:36 From Jonathan Zuck to Everyone:
Remember, the purpose of this exercise is to suggest topics for discussion by the GNSO, not to propose solutions, per se

21:22:55 From Sivasubramanian M to Everyone:
@Jonathan Thanks

21:24:17 From Jonathan Zuck to Everyone:
One of the most maddening challenges is a disconnect between the contracted parties and ICANN contract compliance on the tools in place to deal with so-called "bad actors."

21:24:37 From Abdeldjalil Bachar Bong to Everyone:
Hello Staff , ISSac Maposa would like to have a dial out on 00263772479231 . thanks

21:25:20 From Holly Raiche to Everyone:
@ JZ - Is it the actual tools are partly the apparent reluctance on the part of Compliance to use them?

21:25:41 From Sivasubramanian M to Everyone:
@Jonathan It is not only of interest for Contracted parties and compliance, what do the other stakeholders have to say on the tools>

21:25:44 From Sivasubramanian M to Everyone:
?

21:26:53 From Sivasubramanian M to Everyone:
@Holly or the reverse? a reluctance on the part of Contracted parties to develop / make use of the tools as available as the Compliance sees them?

21:26:55 From Jonathan Zuck to Everyone:
@Holly, that is certainly the position of the contracted parties, that what we're seeing is a reluctance on the part of ICANN to deal with bad actors, not a lack of tools.

21:27:01 From Holly Raiche to Everyone:
(sorry - should read tools OR)

21:27:03 From John McCormac - [HosterStats.com](https://www.hosterstats.com) to Everyone:
@Holly some of the tools like the algorithm based approaches are based on WHOIS data. (The Eurid/[DNS.be](https://www.dns.be) approach). They don't scale to a global /gTLD level because of the lack of WHOIS data.

21:27:04 From Gisella Gruber - ICANN Org to Everyone:
Abdeldjalil - de suite pour le canal francais. Merci!

21:27:15 From Holly Raiche to Everyone:
Thans JZ

21:28:38 From Jonathan Zuck to Everyone:
Other actors, such as the IPC, have done deep dives into the contracts and believe that compliance has more power than it uses, including some powers of "interpretation," of vague language. In the end, we really need clarity on the perspective of Contract Compliance.

21:29:47 From Jonathan Zuck to Everyone:
@JM, the lack of whois data has certainly changed the game somewhat. That said, there are some enormous registrars that have quite a bit of data that could be brought to the table.

21:30:21 From Jonathan Zuck to Everyone:
we need a "working definition" but perhaps not a final definition to find things to be done

21:30:42 From John McCormac - [HosterStats.com](https://www.hosterstats.com) to Everyone:
@JZ Yep but getting a standard approach to handling DA across all registrars will be important. A unified approach and even a checklist will help.

21:31:03 From vandascartezini to Everyone:
thanks alan.

21:31:30 From Cheryl Langdon-Orr to Everyone:
Nice tight specific scoping is essential YES!

21:33:55 From John McCormac - [HosterStats.com](https://www.hosterstats.com) to Everyone:
Not broaden the definition. It needs precision and the ability to adapt to DA as it evolves. The EU paper was heavily criticized by CENTR and the over-broad definition was one of the issues.

21:34:44 From Cheryl Langdon-Orr to Everyone:
Indeed @John

21:35:21 From Cheryl Langdon-Orr to Everyone:
but we need to find a progressable point

21:35:44 From Jonathan Zuck to Everyone:
so we all agree ;)

21:35:50 From John McCormac - [HosterStats.com](https://www.hosterstats.com) to Everyone:
:)

21:36:05 From Cheryl Langdon-Orr to Everyone:
so the definition needed excuse" is not a tool for distraction and non progress

21:36:15 From Jonathan Zuck to Everyone:
indeed

21:37:07 From Bill Jouris to Everyone:
If necessary to get agreement, we can take a narrow (and generally agreed) definition, and explicitly label it as "initial"

21:37:36 From John McCormac - [HosterStats.com](https://www.hosterstats.com) to Everyone:
The problem with a definition is that without the precision of the contracted parties one is that it blurs the line between DA and content abuse. That would have everyone trying to solve multiple problems at once.

21:38:02 From Jonathan Zuck to Everyone:
@Bill, even doing that would lead to a debate about the definition. We can simply call it a working a definition. To Alan's point, we can just stop talking about the definition and talk about the problems.

21:38:58 From Cheryl Langdon-Orr to Everyone:
back to the essential need for *tight* PDP scoping importance perhaps then @John

21:39:01 From Justine Chew to Everyone:

I will just report that the GNSO Council Small Team on DNS Abuse are still waiting on responses to that questionnaire from the GNSO SG/Cs/ So, that small team is in early stages of its work still.

21:39:04 From Olivier MJ Crepin-Leblond to Everyone:

definitions can last forever to write specially as there are real differing views on the definition

21:39:07 From Sivasubramanian M to Everyone:

if we go by a limited definition as Greg proposes, how are those aspects of abuse that fall beyond the present definition to be addressed? by whom?

21:39:09 From Olivier MJ Crepin-Leblond to Everyone:

definition

21:39:37 From Cheryl Langdon-Orr to Everyone:

Noted @Justine

21:39:38 From John McCormac - [HosterStats.com](https://hosterstats.com) to Everyone:

@JZ @Cheryl Split what can be solved technically away from what can be solved with legal methods hence the multiple PDPs.

21:39:54 From León Felipe Sánchez Ambía to Everyone:

Indeed Olivier. The wordsmith effort can be endless and when we all agree, something changes and sends us back to the blackboard to wordsmith again

21:40:04 From Cheryl Langdon-Orr to Everyone:

May as well @John...

21:40:21 From Cheryl Langdon-Orr to Everyone:

small manageable time bound ones preferably

21:41:13 From John McCormac - [HosterStats.com](https://hosterstats.com) to Everyone:

@Cheryl Yep. And hope that the characteristics of DA don't change while they are all going on. :)

21:41:40 From Cheryl Langdon-Orr to Everyone:

:-)

21:42:38 From Holly Raiche to Everyone:

Very helpful comments on ALAC presence in that WG

21:43:26 From Samuel Danso to Everyone:

Aa information to all, we, from the NOMCOM, met in Washington during one week as a pilot face to face and I am glad to share that everything worked very well. we have been tested every day before entering the room, used masks and the result was good- none got sick, the process was comfortable and worked quite well.

21:55:01 From Maureen Hilyard to Everyone:

Many thanks to Yrjo and Justine for this effort

21:55:20 From Holly Raiche to Everyone:

Thanks Vanda for the report

21:55:38 From Chokri Ben Romdhane to Everyone:

21:55:38 From vandascartezini to Everyone:

21:56:25 From Cheryl Langdon-Orr to Everyone:

A point we seem to have to remind people of regularly @AG

21:56:50 From vandascartezini to Everyone:

@Holly, thanks. as a pilot being positive in all aspects is a good news for next F2F meetings

21:58:12 From John McCormac - [HosterStats.com](https://hosterstats.com) to Everyone:
That's got to have been one of the fastest discussions of DA and definitions that I've ever seen. :)

22:00:47 From Cheryl Langdon-Orr to Everyone:
A very good thing ...Agreed @JZ

22:01:12 From Greg Shatan to Everyone:
@John, maybe people are getting tired of talking about talking about DNA and definitions....

22:02:01 From John McCormac - [HosterStats.com](https://hosterstats.com) to Everyone:
@Greg Possibly.

22:02:20 From Heidi Ullrich - ICANN Org to Everyone:

22:03:00 From Holly Raiche to Everyone:

Excellent Lianna

22:07:25 From Lianna Galstyan to Everyone:
Thanks, Cheryl

22:07:56 From Cheryl Langdon-Orr to Everyone:
Tabs to topics makes sense in the GNSO context IMO

22:13:14 From Cheryl Langdon-Orr to Everyone:
Agree on that inclusion of ALAC point @Justine!

22:13:14 From Jonathan Zuck to Everyone:
given the main issue is confusion of individual end users

22:15:45 From Cheryl Langdon-Orr to Everyone:
Thanks Maureen not seeing a huge issue with this small refractory period in O&E as long as we get back on track

22:15:57 From Judith Hellerstein to Everyone:
