

Zoom Chat: 2019-06-26 At Large Universal Acceptance (UA) Kickoff

03:23:20 From Presenter : Hello, my name is Yeim Nazlar and I will be monitoring this chat room. In this role, I am the voice for the remote participants, ensuring that they are heard equally with those who are "in-room" participants. When submitting a question that you want me to read out loud on the mic, please provide your name and affiliation if you have one, start your sentence with <QUESTION> and end it with <QUESTION>. When submitting a comment that you want me to read out loud of the mic, once again provide your name and affiliation if you have one then start your sentence with a <COMMENT> and end it with <COMMENT>. Text outside these quotes will be considered as part of "chat" and will not be read out loud on the mic. Any questions or comments provided outside of the session time will not be read aloud. Please note that audio is available in French and Spanish. All chat sessions are being archived and follow the ICANN Expected Standards of Behavior: <https://www.icann.org/resources/pages/expected-standards-2012-05-15-en>

03:48:40 From Presenter to MTS Tech (Privately) : Hi Kevin - Heidi wants the AC to be turned off

03:48:55 From Presenter to MTS Tech (Privately) : Could you please? Sorry...

03:49:46 From MTS Tech to Presenter (Privately) : I'll run it through the channels. The controller in the hall is already off, but doesn't seem to be controlling the room anymore

03:53:43 From Presenter to MTS Tech (Privately) : Ok, thanks

03:58:27 From Jahangir Hossain : <Comment> I think we make some material for ALSs to build awareness on UA </Comment>

03:59:19 From Jahangir Hossain : and translate this to own local language

04:04:58 From John Laprise : Absolutely

04:06:23 From Edmon Chung : yes we have some materials at UASG, but i think they can be customized for ALSes

04:07:12 From Edmon Chung : <https://uasg.tech/information/it-leaders/>

04:07:21 From Jahangir Hossain : @Edmon, thanks

04:12:03 From Edmon Chung : +1 on jonathan's suggestion... UASG actually has a number of "template" articles, which ALSes can customize for this type of outreach

04:12:18 From Edmon Chung : i.e. posting something on their blog or newsletter or fb page etc.

04:13:16 From Justine Chew : <Comment> I think At -Large, especially all the RALOs with linguistic diversity, also has a role as actors bringing the consumer demand angle for EAI as an impetus for software programmers/providers etc to implement the right solution. <comment>

04:14:49 From Justine Chew : +1 Ajay

04:15:22 From Justine Chew : exactly, @Jonathan

04:27:21 From Edmon Chung : that does not mean universal acceptance issue, if the network operator is aware and ready to accept but decide not to accept for security or other reasons that is not a UA issue

04:28:35 From Edmon Chung : the brief "reason" is that developers made different assumptions of how domain names and email addresses looked like (syntax) in the past that is no longer accurate assumptions

04:30:34 From Edmon Chung : consumer trust in new gTLDs

04:38:01 From Edmon Chung : totally agree that we should update all networking 101 course materials :-P

04:41:46 From Edmon Chung : its a critical mass issue... when tools are not ready it makes it more difficult to make systems UA ready

04:58:50 From Edmon Chung : sec@uasg.tech

04:59:15 From Edmon Chung : just for everyone's reference, just let us know if you need help with materials etc

05:00:07 From Remmy Nweke : Please add me or send us materials @ remmyn@yahoo.co.uk

05:02:53 From Edmon Chung : we will reach out to you Remmy

05:03:12 From Remmy Nweke : thanks @Edmon

05:03:59 From Presenter : thank you all for joining
