04:17:01 From ArHeCo.Pro : <QUESTION>

Hello, There is an hour mismatch; all my devices indicate it is one hour later in Morocco. As far as I understand Morocco shall be UTC+1/CET. Am I the one somehow mismatching? Or are all (100%) my devices synching with a malicious server?

Should this be a security/reliance aspect to take into deep review? Because an hour mismatch on servers can be a missed Legal Deadline.

<QUESTION>

04:18:32 From Presenter : The session started on time - at 08:30 local time

04:23:51 From ArHeCo.Pro : But all (100%) of my Smart Devices, on different apps, indicate it is already 10:20 on CET/UTC+1.

04:30:14 From John Laprise : That may be but here we all agree it's presently 9:30 (this moment)

05:11:14 From Presenter : Thank you all for joining.
