

ICANN WHOIS WEBINAR - AC Chat transcript - 2013.10.15 - 1200 UTC

Nathalie Peregrine: Dear all, Welcome to the ICANN Whois Privacy/ Proxy Abuse Study Findings Webinar on the 15th October 2013 at 1200 UTC.

Nathalie Peregrine: There will be audio streaming only in the Adobe Connect room. If you wish to ask a question over the audio at the end of the presentation, please dial into the audio bridge, password WHOIS.

Carlton: Serendipity? - "tpyers" on typosquatting!

Carlton: :-)

Lisa Phifer: :-)

Dev Anand Teelucksingh: :-) noticed it too

Carlton: "typoquatting"

Mary Wong: Thanks, guys - we will fix these for the next webinar & recording!

Lisa Phifer: Ah Richard's humor!

Nathalie Peregrine: All lines are being opened now

Carlton: I can't get to the bridge but can Richard answer this question: Did the study show privacy/proxy service providers use unreachable phone numbers?

OrenD: There are many :)

OrenD: many of them do not publish their phone numbers at all and reachable only by mail/tickets

Carlton: Thanks much. I was hoping to hear that alternate contact preference might be a factor.

OrenD: I have a question to the ICANN members: what are the action items from this study? clearly, there is a problem (known for years; this great study just proves that)

Carlton: @OrenD: Olivier is Chair of ALAC and will tell you the ALAC position is on record; privacy/proxy service must be regulated

Olivier Crepin-Leblond: ALAC Statement currently being voted on: <https://community.icann.org/x/-xWMAg>

Carlton: @Richard: Yes, the evidence of legitimate use of both services is well established. That is why the ALAC believes that ICANN must determine terms and conditions of the service offerings; regulation

Carlton: @Richard: From your intuit, would you delineate the distinctions between a privacy and proxy for record?

Lisa Phifer: Proxy provider IS the registrant; Privacy provider is not

Lisa Phifer: thanks

Carlton: @Richard: Thanks. +1 to Lisa's addition. Just wanted that on the record

Carlton: ...meaning the audio record

Carlton: :-)

Lisa Phifer: Thanks to NPL for a great study and presentation

Carlton: Excellent!

Carlton: Thanks very much Mary Richard & Team

Dev Anand Teelucksingh: thank you all
