

# .blah

This is a mockup of the fictional .blah gTLD wiki page for a comment page for evaluation panel's consideration (String Similarity, DNS Stability, Geographic Names, Technical & Operational Capability, Financial Capability, Registry Services, Community Priority) for the 60 day Application Comment Period.

Comments on objection grounds (limited public interest, community grounds) are kept on a separate wiki page

On this page, there would be a link to the gTLD application, followed by comments
