		Standing Committee on Improvements Implementation
		Draft ideas for a Working program  1. Review on request
		develop a standardized way to "raise an issue" with respect to the rec's in scope target group: everyone within the GNSO
		Maybe we should discuss this similar to the way it was done for the new PDP:
		Definition of "raising an issue" who can raise an issue
		elements to be covered:
		issue discovered for improvement     identify party raising the issue
		Now the GNSO is effected by the issue?     what could be the target by modifying/amending the existing situation (e,g, effectiveness, cost saving)?
		2. Review on a periodic timescale
		Here we may list the set of recommendations in scope and those out of scope
		prioritize the rec's listed
		discuss the periodicity (in accordance with the general GNSO improvements schedule) prepare for conversations with Working Groups having finished their job to find out benefits and malfunctions in the related processes (e.g. OSC, PDP-WT, IRTP, PEDNR)
		target group: WG leaders develop a checklist/questionnaire regarding the usability of the WG guidelines
		target group: WG members check the acceptance and usefulness of the toolkit available so far
		target group: SGs/constituencies W
10	10	Standing Committee on Improvement Implementation Update to the GNSO Council
00	30	
10	11	Registration Abuse Policies Recommendations - Discuss approach - next steps in relation to remaining recommendations
30	15	
11	12	Discussion Paper on Best Practices to address the abusive registration of domain names - Status update & discussion [http://singapore41.icann.org/meetings/singapore2011/presentation-best-practices-address-registration-abuse-18jun11-en.pdf
15	00	
12	13	General Discussion
00	00	(1) Potential Council motions

GNSO Council & Board Discussion Topics to discuss with the Board – Saturday, 18 June 17:30-19:00

30 00

- In light in particular of Larry Strickling's various speeches, including in SF, it could be interesting to hear how the Board views and plans to act on:
- a) the AoC process & outputs to date, and the broader progress of transparency & accountability across the range of ICANN processes;
  b) the AoC's repeatedly stated requirement that ICANN act in the public interest. While there've been some preliminary discussions on such matters, the AoC is now almost two years old, so we ought to be able to have a more probing and structured discussion with the benefit of experience.
- Community Working Groups (CWGs) is a discussion we need to continue to have with the Board, if only to update them on the recent discussions we've had amongst ourselves.
- GNSO/Board interact. This is changing, at the Board's initiative. We should perhaps touch on how useful we've found our dinners and interaction with the Board in the past.
- Discuss an anti-revolving door policy with the Board.
