

# AFRALO Webinars Series 2022

## Background:

Due to the limitations in our face to face meetings imposed by ongoing current health crisis, the AFRALO leadership team has discussed the best ways to keep this great community engaged, making this “online only” time more beneficial and productive for all.

## Goal:

To provide the AFRALO community with webinars as an online tool to undertake AFRALO activities. The objectives are to carry out any activity we need to do and strengthen capacities of our members, advancing the knowledge of participants toward an agreed learning objective which will contribute to enhance AFRALO’s members participation in At-Large’s Policy Advice development.

## Webinar Coordinators:

The Leadership appointed Tijani Ben Jemaa and Bram Fudzulani (our regional O/E Co-Chair) to coordinate this effort.

## Topics:

For the capacity building, the topics to be addressed were identified through a Survey. As per the survey result, 6 topics for capacity building prior to statement drafting were selected :

DNS Abuse
<a href="#">Privacy and Data Protection</a>

ICANN's multi-stakeholder model
DNSSEC
IPv6
UA and IDNs

Other topics as per the Survey **RESULTS**.

**Schedule:**

The CB webinars will be held during March, April, May, August, October, and December.

Date	Time	Topic	Speakers	Moderator	Resources
28 Apr 2022	18:30-20:00 UTC	<a href="#">Privacy and Data Protection</a>	Brian Gutterman, Paul Muchene, Yazid Yazid Akanho	<a href="#">Hadia Elminiawi</a>
