

Architecture

The DSSA working group is using this "architecture" diagram to define the scope of the threat events that we evaluate. This page is where we're tracking our work.

Document types:

PDF -- these are read-only files that allow navigation of the mind-map -- later versions are expandable, but they must be opened in Adobe Reader 9 or later

MM -- these are the editable mind-map files -- here is a link to the [Freemind](#) program that we are using for our work

HTML -- these are straight text html files that can be read by any web browser

Results of the 9-Feb Conference call
