DevNET

DevNet is a Guyana-based not-for-profit NGO working in ICT for development. It is registered (No: 934) under the Friendly Societies Act (Cap 36.04). DevNet's mission is to use the experiences and successes of the SDNP initiative to contribute to sustainable development, using Internet and ICT technology, by helping to:

- provide efficient and cost effective access to the Internet for marginalised groups and in a development context;
- build high-quality solutions for the collation, dissemination, and exchange of information and knowledge between all sectors of Guyanese society
- design and implement innovative projects that bring new approaches to the use of ICTs for development
- implement initiatives which would cross subsidise the activities executed to achieve the other objectives.
