IPAC Mission

Information Policy Analytical Center (IPAC) is working in Azerbaijan to promote the adoption of legal and regulatory frameworks that will support the growth of an open and protected, affordable and user-controlled Internet – an Internet that can drive economic growth and advance human development.

IPAC's aim is to convene dialogue and build informed consensus among all stakeholders, providing objective expertise on policy issues, commenting on draft legislation, and assisting policymakers and civil society in achieving a better understanding of the legal environment needed for the Internet to develop.

IPAC is a consulting resource and channel on transferring ICT-related

best practices and international models to local ICT stakeholders.

IPAC's activity directly focuses on Internet governance and its implications for a better understanding of the crucial role of Internet governance issues at the national level.
