

Timeline for RG activities

Suggested timetable for gTLD RG during the Objection Period

Date	Activity
June 13 2012	Reveal Day - start of 7 month Objection Period
January 16 2013	The gTLD RG seeks comments from At-Large during the Objection Period. Comments received from At-Large are added to the new gTLD Dashboard at http://bit.ly/newgtld where other members of the At-Large community can read and post further comments.
January 18 2012	The gTLD RG reviews the comments on the new gTLD Dashboard and for each gTLD application with At-Large comments, the gTLD RG decides whether or not to draft a formal objection statement directed to that gTLD application on either limited public interest grounds or community grounds or both.
February 1 2013	Where the gTLD RG determines that an objection statement is appropriate, the gTLD RG proceeds to drafting the objection statement, keeping the At-Large community informed via the gTLD Dashboard. The gTLD RG publishes final objection statements to gTLD applications in a format ready to submit to the Dispute Resolution Service Provider (DRSP).
March 1 2013	Each of the 5 Regional At-Large Organisations (RALOs) reviews each objection statement and decides whether it supports the filing of the objection statement by the ALAC. Each RALO sends to the ALAC its advice on the objection statements on whether the RALO supports the filing of an objection statement by the ALAC or not.
March 2 2013	Objection statements NOT supported by at least 3 RALOs will not be considered by the ALAC. For those objection statements that are supported by 3 or more RALOs, the ALAC decides whether to file such objection statements to the DRSP.
March 13 2013	end of Objection Period

Suggested timetable for gTLD RG during the Application Comment Period

The new gTLD Review Group (gTLD RG) agreed to the revised timetable due to the ICANN Prague meeting taking a great deal of time for At-Large to submit comments

(See [email to the gTLD RG list](#))

Date	Activity
June 13	Reveal Day - start of 60 day Application Comment Period (ACP)
until end of July 26	get comments from At-Large on the At-Large new gTLD Applications Dashboard Workspace (this would be Figure 2 of the Procedure to submit comments on and file objections to new gTLDs)
July 26 - July 27	gTLD RG would review comments on the At-Large new gTLD Applications Dashboard Workspace and decide whether to draft formal comments (this would be Figure 3 of the Procedure to submit comments on and file objections to new gTLDs)
July 26 - August 2	draft of formal comment posted on At-Large new gTLD Applications Dashboard Workspace and worked on by gTLD RG (this would be Figure 4 of the Procedure to submit comments on and file objections to new gTLDs)
August 2 to August 10	final comment posted by gTLD RG on August 3 for ALAC's approval (this would be Figure 5 of the Procedure to submit comments on and file objections to new gTLDs)
August 12	ACP ends
