CWG-RFP5 - NTIA Requirements (validation of)

V. NTIA Requirements

Additionally, NTIA has established that the transition proposal must meet the following five requirements:

- Support and enhance the multistakeholder model;
- Maintain the security, stability, and resiliency of the Internet DNS;
- Meet the needs and expectation of the global customers and partners of the IANA functions;
- Maintain the openness of the Internet;
- The proposal must not replace the NTIA role with a government-led or an inter-governmental organization solution.

This section should explain how your community's proposal meets these requirements and how it responds to the global interest in the IANA functions.

Note: CWG-RFP3 and 4 should have considered this in their work and this should only be a final sanity check to produce the text confirming this requirement once 3 and 4 are completed.

CWG requirement:

Name = CWG-RFP5

Delivery = Week of November 17

Link to Drafting / Collaborative Workspace: (noting all comments and contributions are welcome) is here

Volunteers: Group is OPEN and welcomes new participants and contributors to its work.

- Cheryl Langdon-Orr (ALAC) Work Group Coordinator
- Lise Fuhr (ccNSO)
- Dwi Elfrida (GAC)
- Geetha Hariharan
- Bill Manning
- Avri Doria
- Bilal al Titi
- Gary Campbell
- Desiree Miloshevic
- Jaap Akkerhuis
- Andrew Harris (GNSO)
