Eighth Webinar on the Topic: "Input of At-Large into the Transition / Accountability Process" 2015-09-28 AC Chat

Terri Agnew:Welcome to the At-Large Capacity Building Program-2015: Eighth Webinar on the Topic: "Input of At-Large into the Transition / Accountability Process" on Monday, 28 September 2015 at 13:00 UTC

Terri Agnew:meeting page: https://community.icann.org/x/6ZZYAw

murraymckercher:Good Morning Terri

Gisella Gruber:Good morning Murray! Gisella here :-)

Ricardo Holmquist - ISOC Venezuela:good morning

Gisella Gruber:Good morning and welcome to Venezuela

Otunte Otueneh:Good afternoon Gisella. Good afternoon all.

Alfredo Calderon:Good Morning to all!

Alfredo Calderon:From ISOC Puerto Rico

Ron Sherwood:Good morning all

Matthieu Camus:Good afternoon!

Siranush Vardanyan - APRALO:hello, everyone, thanks, Gisella

Ali AlMeshal:Hello everyone

Siranush Vardanyan - APRALO:Happy Ramadan, Ali, hope you enjoyed your holiday :)

Ali AlMeshal:Haha Siranush , it is not Ramadan!!

Ali AlMeshal:it is Eid Al Haj

Siranush Vardanyan - APRALO:it's HOLIDAY anyway:)

Ali AlMeshal:Yes :)

Cheryl Langdon-Orr:hi all

Siranush Vardanyan - APRALO:hi, Cheryl

Akin-Awokoya Emmanuel:Hi all

Akin-Awokoya Emmanuel:We can hear you Olivier

Glenn McKnight:We willl be posting the video we shot on Thursday whic included Alan

Glenn McKnight:THis is was the ISOC Canada event

Glenn McKnight:10:45 to 12:15 – Session 2: ICANN Accountability and the Transition of IANA StewardshipThis session will examine the work that is currently being done to make ICANN more accountable to its stakeholders and to transition the IANA function stewardship away from the US National Telecommunications and Information Administration ("NTIA") and why these issues matter to everyone. The session will start with a description of the structure and functions performed by ICANN, including the IANA function. The role of ICANN in the Internet multi-stakeholder governance model will be discussed, and the involvement of governments in Internet governance will be addressed. This background will then be used as the launching point for a discussion of how the evolution of ICANN and the transition of the IANA function can affect the openness, security, stability and resiliency of the Internet. Panelists will include:Moderator: Glenn McKnight, Assistant Treasurer of ISCCKaren Rose, Senior Director of Strategy and Research at th

Alan Greenberg:Glenn, that post was truncated

Glenn McKnight:I willl repost in small chunks

Glenn McKnight:Here s te pictues of the event including your Slides

Glenn McKnight:https://www.flickr.com/photos/glennmcknight/albums/72157658625474180

Glenn McKnight: ICANN Accountability and the Transition of IANA StewardshipThis session will examine the work that is currently being done to make ICANN more accountable to its stakeholders and to transition the IANA function stewardship away from the US National Telecommunications and Information Administration ("NTIA") and why these issues matter to everyone.

Glenn McKnight:he session will start with a description of the structure and functions performed by ICANN, including the IANA function. The role of ICANN in the Internet multi-stakeholder governance model will be discussed, and the involvement of governments in Internet governance will be addressed.

Glenn McKnight:This background will then be used as the launching point for a discussion of how the evolution of ICANN and the transition of the IANA function can affect the openness, security, stability and resiliency of the Internet.

Glenn McKnight:Panelists will include:Moderator: Glenn McKnight, Assistant Treasurer of ISCCKaren Rose, Senior Director of Strategy and Research at the Internet Society ("ISOC")Cathy Handley, Executive Director Government Affairs of the American Registry for Internet Numbers ("ARIN")Alan Greenberg, Chair of At-Large Advisory Committee ("ALAC") of ICANN and member of the Cross Community Working Group ("CWG") of ICANNAllan MacGillivray, Senior Policy Advisor to the President at the Canadian Internet Registration Authority ("CIRA")

Alan Greenberg:I heard an interesting statistic at the meeting that Glenn has referred to. The average number of interactions that all 5 RIRs have with IANA (now that IPv4 addresses have run out at the IANA level) is 13 per year. That is the total for all 5 RIRs!

Glenn McKnight:The video of this session will be posted soon

Alan Greenberg:That presume we can find a volunteer knowledgable in registry matters to put the time into CSC participation.

murraymckercher:fyi..i found the following part of the wiki helpful in understanding exactly what the IANA functions are..

murraymckercher:https://www.icann.org/news/blog/iana-functions-usage-analysis

Dev Anand Teelucksingh:ALAC statement on 2nd Draft Proposal of the Cross Community Working Group to Develop an IANA Stewardship Transition Proposal on Naming Related Functions : https://community.icann.org/x/XConAw

Glenn McKnight:@ Alan's comment above on RIR's is quite interesting.   I willl paste the slide in the chat box

Joly MacFie:Alan, is there not need to co-ordinate v6 number distro?

Alan Greenberg:Each RIR gets blocks from IANA. Rules for distribution already established, and blocks are so large that they do not need to go back very often.

Alan Greenberg:But for the record, I am quoting the number (provided by Cathy Handley from ARIN) and I have no real inside scoop on the details of the interactions.

Alan Greenberg:Also noted that based on the number of /24 (256 address) IPv4 blocks available to ARIN, last Thursday was the day that for ARIN, IPv4 addresses were expected to run out.

Dev Anand Teelucksingh:Thanks

Graham Schreiber:GNSO / ccNSO ~   This is how CentralNic has been able to blend-in with their FAKE.cc.COMs and .LA

Graham Schreiber:That coupled with the fact that they sold .UK under NOMINET's predecessor, the "Naming Committee"

Graham Schreiber:Both the Private-Sector and Businesses using dotCOM are subject to FTC Antitrust Lawl and all other applicable USA Laws.

Graham Schreiber:ICANN ~ Contract Compliance let CentralNic DOMAIN NAME / Fake.cc.COMs harm comsumsers and confuse / redirect consumers from ccTLDs like .UK ~ .DE ~ .EU etc, etc.

Akin-Awokoya Emmanuel:Really I dont understand what Fake.cc.coms means in the context

Graham Schreiber:.uk.com violates the ICANN RAA 3.7.7.9 as it's marketed to Infringe & Dilute .COM with SUB-Domains.

Graham Schreiber:Hi Akin: Please see ...

Graham Schreiber:CentralNic's domains provide an alternative to the existing Top Level Domains (TLDs) and Country Code Top Level Domains

(ccTLDs), allowing the creation of a simultaneously local and global Internet Identity.<><>https://www.centralnic.com/portfolio/registration

Akin-Awokoya Emmanuel:thank look at that quickly

Graham Schreiber:Thanks, You and the United States Department of Justice at SCOTUS, with FTC FBI & WWWICEgov

Akin-Awokoya Emmanuel:Thank you

Graham Schreiber:ICANN will definatively become the subject of United States Law.

Graham Schreiber:http://www.supremecourt.gov/search.aspx?filename=/docketfiles/14-1480.htm

Graham Schreiber:SCOTUS Conference of September 28, 2015 is on ICANN Et Al.   They'll make ICANN "Accountable".

Abdeldjalil Bachar Bong:Bonsoir á Tous

Gisella Gruber:Bonsoir Abdeldjalil

Akin-Awokoya Emmanuel:"it would be nice if we succeeded"

Graham Schreiber:I'm for ACCOUNTABILITY to be imposed on ICANN.   Maintaining ICANN u/ USA Laws & oversight.

Joly MacFie:ALan: What's the rush?

Abdeldjalil Bachar Bong:Merci Gissela je suis en retard mais ça n'empeche pas de prendre le train

Johnny Laureano:thanks

Olivier Crepin-Leblond:My point of view is that all of this talka bout Court battles are a Red Herring. If lawuits start flying across ICANN's community, the ICANN multistakeholder model will be dead.

Dev Anand Teelucksingh:Agreed, Olivier

Joly MacFie:The 90 day I know

Joly MacFie:Thanks Alan

Carlton Samuels:Um, well, court battles are not unusual. Except that most tended to be from contracted community - or folks who would wish to be in the contracted house

Akin-Awokoya Emmanuel:Hello

Graham Schreiber:Hi Olivier Crepin-Leblond ~ Courts make companies, like ICANN, conduct themselves "accountability" within proper & well considered Laws.

Gisella Gruber:Akin-Awokoya - are you able to speak?

Olivier Crepin-Leblond:Emmanuel's mic is working now

Carlton Samuels:Well, so long as ICANN remain a U.S corporation all parties with grievance will have unfettered rights to go to U.S. District court

Carlton Samuels:Even if the membership model prevails

Olivier Crepin-Leblond:@Graham: understood - but how likely is it that ICANN remaining a US corporation will satisfy the rest of the world?

Olivier Crepin-Leblond:I gather Jurisdiction issues will be addressed in Work Stream 2 of Accountability which is likely to be a lot further in the future

Graham Schreiber:For the record, I like ICANN as it was originally composed, by the US Government.

Graham Schreiber:It is and thanks for the consideration.

Gisella Gruber:Please note we are not able to interpret

Carlton Samuels:That Work Stream 2 will be makework. The U.S. government already signals its intent; I doubt any USG will change that, at least until they rescind the presidential executive order that 'the Internet is in the national security interest of the United States'. I think the US remianing the jurisdiction for ICANN will remain in the forseeable future in furtherance of 'stability and security'.

Dev Anand Teelucksingh:have to step away from the call, thanks for the presentations from Olivier and Alan Very informative

Glenn McKnight:Great job thanks

Glenn McKnight:Bye

Ariel Liang:@Graham - I'm pasting your comment here (you put in the Q&A pod but it's a comment rather than a question)

Ariel Liang:Graham Schreiber: Thanks. Board Members of ICANN / IANA Board, in my opinion, should be composed of Elected Employeess of ccTLDs and could therefore be able to represent "National Members" on the Global Root mangement.

Graham Schreiber:Thank you @Ariel Liang

Ali AlMeshal:Thanks for both speakers

Ali AlMeshal:bye

Ariel Liang:no problem Graham

Alan Greenberg:We have4 minutes!

Abdeldjalil Bachar Bong:bye

STEFANO TRUMPY:VERY interesting; thanks

Graham Schreiber:Hi Olivier Crepin-Leblond: ~ I'm a Canadian citizen & netizen, whom the USA can use as an example of being a Non-American ~ Self Represented / Harmed Person ~ who's been given fair consideration.

Sébastien:Depending of where we are at that time?

Cheryl Langdon-Orr:I am not voting on this Q

Sébastien:I abstain

Graham Schreiber:Today, as I sit in a DC Hotel the SCOTUS Court is considering my Lawsuit against ICANN Et Al.

Ariel Liang:The poll is in the bottom right corner (in case any of you didn't see it)

Graham Schreiber: 5 ~

Ariel Liang:@graham - please cast your vote in the pod :)

Graham Schreiber:I just did, I hope it worked.   It didn't show a "received" type confirmation.

Aziz:haha

Graham Schreiber:5 ~ The webinar is great!   Thanks.

Ron Sherwood:Thanks to all , Bye

Ariel Liang:@Graham - you are right that it won't show the 'received' confirmation. From staff side we will be able to check who voted at the end

Ricardo Holmquist - ISOC Venezuela:ty vm for the webminar

Graham Schreiber:Thanks all.   Cheers, Graham.

Carlton Samuels:Thanks all

Akin-Awokoya Emmanuel:bye all

Alfredo Calderon:Great work from all!

Heidi Ullrich:Thanks, All!

Ariel Liang:thanks all!

Matthieu Camus:thank you!
