Task 8: Developing a Possible Requirements List

The RDS PDP WG extracted from key input documents and other sources a comprehensive and inclusive list *possible* requirements for gTLD registration directory services and data. The latest draft of that initial list is:

- [Draft 5: RDS PDP Initial List of Possible Requirements for gTLD registration data and directory services \(28 October 2016\) \[PDF\]](#) and [\[DOC\]](#)
- An Excel workbook version is also available for filtering: [PRSpreadsheets-D5Triage-28October.xlsx](#)
(Hint: Set all column filters to "All" to view all rows)

For a list of key input documents and assignments for WG members to extract further possible requirements from those sources, [visit this Sign-Up Sheet](#).

In addition, the RDS PDP WG completed the following preparatory steps before beginning deliberation:

- Drafting a [problem statement for this PDP WG](#) (task completed)
- Drafting a [representative set of example use cases](#) (task completed)
- Drafting a [registration data and directory service statement of purpose](#) (work in progress)

Task 4: Summarizing Key Inputs
