

Review of all Rights Protection Mechanisms in all gTLDs

PDP Home

Welcome to the online collaborative wiki workspace for the GNSO Working Group that will be conducting a Policy Development Process (PDP) to Review all Rights Protection Mechanisms (RPMs) in all gTLDs.

This PDP is being conducted in two phases, as described in the [approved charter](#): Phase One will focus on a review of all the RPMs that were developed for the 2012 New gTLD Program, and Phase Two will focus on a review of the Uniform Dispute Resolution Policy (UDRP).

This workspace will be updated continuously to reflect the status and progress of work of the PDP Working Group.

As these wiki pages contain drafts and other work in progress, the authoritative space for all relevant resolutions, final documents, and milestone tracking can be found on the main GNSO website: see [Project Page](#) on gnso.icann.org.
