This workspace was used to build the EURALO Hot topics for 2017.

This report identifies the key ICANN-related policy issues for EURALO and European end users in general, as well as outreach and engagement activities conducted by EURALO members.

This report is built in a bottom-up manner. In order to obtain input from all EURALO members, whether members in an ALS or individual members, a Google Doc has been created.

The starting document is the 2016 EURALO Hot Topics document. Members were encouraged to comment and suggest amendments to the document until 30 September 2017.
