

Fast Flux Working Group

PRIVATE work-space

Given the open and transparent nature of ICANN work, I'd like to see us using this space as little as possible. At the same time, some of the brainstorming we do around possible technical and policy solutions may well benefit from being conducted out of the public eye, mostly so as not to provide "bad actors" any insights into our thinking.

So view this portion of the wiki as an "executive session". Ultimately our final recommendations will have to be moved to the public wiki.

Mike O'Connor
